------------	-----------------------

* self fertile

1 Japanese Plums need another of the listed Japanese Plums for pollination.

2 European Plums need another of the listed European Plums for pollination.

3 Except for those marked as self fertile, Cherries need another of Cherry variety for successful pollination. Stella is helpful in pollinating most cherry varieties.

4 Almonds need another of the listed Almonds for pollination.

In general pollination compatibility is affected from season to season by variations in flowering time, climatic conditions and bee behaviour and numbers.
